More designs via plugin

Choose Classic or Modern, both designs are included in the core extension. Other designs we are selling separately in plugin Template packs

Make it yours

Use a local logo, choose an accent colour, and add optional plain-text introductions and closing messages to suit your business.

Preview your documents

Review sample HTML emails and invoices, plus a sample PDF rendered through VirtueMart's PDF engine, before testing real orders.

Built around VirtueMart

Keep VirtueMart's order data, tax breakdowns, payment and shipment details, translations and native plugin output within your styled documents.

Protect existing customisations

Studio applies template overrides without modifying original VirtueMart files. Existing third-party or modified overrides are preserved and conflicts are reported.

Extend your design choices

Add compatible designs through separately installed design-pack plugins. Classic and Modern remain available as the core designs.

Choose the edition for your shop

Check your installed versions before purchasing and select the matching edition.

Installation requirements by edition. VirtueMart's TCPDF package is required separately for PDF generation.

Requirement	VirtueMart 4.x edition	VirtueMart 5 edition
Joomla		
VirtueMart		
PHP		
PDF engine		
Included designs		

Install only the edition matching your site. The two editions requed different Joomla versions, cannot be installed as separate extensions on the same site. The VirtueMart 4.x edition is tested on 4.8 but should work on older versions from 4.2.6

What the core package includes

- Joomla administrator component for document styling.
- Classic and Modern email and invoice designs.
- Branding settings and sample HTML/PDF previews.
- Tools to apply and remove Studio template overrides.
- Installer plugin for download-key-based updates.

Additional design packs are installed separately and are not part of the core package.

From installation to your first branded order

1. Install the matching package through Joomla's extension installer.
2. Choose and enable your designs, set your branding, and save.
3. Enable VirtueMart layout overrides and apply Studio overrides to the site template used by your shop.
4. Enable HTML order emails and test a new order and invoice on a staging copy.

Before you buy

Does Studio change how my shop processes orders?

Studio styles your documents. VirtueMart continues to calculate prices and taxes, assign invoice numbers, manage order statuses and send emails. Studio does not send extra emails or mark unpaid orders as paid.

Will it redesign invoices I have already generated?

Existing archived PDFs stay unchanged. Test your chosen design with a newly generated invoice.

Can I return to the original layout?

Yes. Disable either document design to use VirtueMart's original layout for that document type. Studio can also remove its unchanged overrides while preserving modified files.

Is this a drag-and-drop template builder?

No. Studio provides ready-made designs and branding settings. Additional layouts can be supplied through compatible design-pack plugins.

Does it require runtime activation?

There is no runtime licence lock or activation call. A download key controls access to update downloads only. The extension is licensed under GNU GPL version 2 or later.

Give your next order a more polished finish.
Choose the edition that matches your Joomla and VirtueMart installation and bring your shop's branding to your order emails and invoice PDFs.
